

Circular

23 February 2021

Last reminder: Abstract submission ends on 1 March

In very few days, the abstract submission for the International Cosmic Ray Conference is closing. Please submit any contribution you wish to present at the ICRC 2021.

Register for the conference: [Click Here](#)

Abstract submission for contributed talks and posters: [Click Here](#)

Fees

Regular fee: 100,00 €

Reduced fee: for some young scientists and undergraduates upon application

Paper fee: 150,00 € per contribution

The fees for participation and paper submission have been estimated conservatively to break even with about 700 participants and contributions (about 30% less than at the last ICRC). Participation of more than about 700 persons/contributions will allow reduction of the fees. **We will give an appropriate discount**, once all abstracts are assessed and before invoices for payments are sent out (around mid-April).

Reduced Registration Fees

We offer discounts for students and young scientists. Undergraduate students get free participation. Postgraduates and postdocs from developing countries in their first year and with an accepted abstract can get a discount to their fees.

For both reductions an application is needed ([Click here](#) for details).

Nomination for prizes closes on 15 March

To suggest deserving persons for the prizes and awards given out at the 37th International Cosmic ray conference 2021, please send **nominations before 15 March**. Awards are made for three young scientists (two IUPAP Young Scientist Awards and the Shakti Duggal Award) and three senior scientists, for a substantial body of work over an extended period (the Bhabha Medal and Prize, the Yodh Prize and the O'Ceallaigh Medal).

See [here](#) the details of the nomination requirements.

Kind regards,

Johannes Knapp for the Local Organising Committee - icrc2021@desy.de -
